Presenter #1

Bob Benoit is President of Lord & Benoit. He served on the most recent COSO Monitoring Project Task Force. He also served on AICPA Peer Review Acceptance Board for ten years. He is the author of the Lord & Benoit Reports, which have been referenced by the SEC, PCAOB, Wall Street Journal, Business Week, all Big 4 firms and over 150 newspapers, magazines, legal, educational and trade journals worldwide. Bob is also the first evaluator to use the 2006 COSO Guidance for Smaller Public Companies, and the inventor of Virtual SOX.

Regulatory Update on SOX 404

Advantages of Virtual SOX

How and Why SOX 404(a) can be done remotely

Tools and Live Demo

SOX IT compliance

Lessons Learned

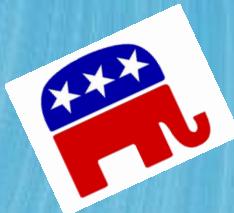

Regulatory Update

PCAOB®

COSO®

Securities & Exchange Commission

“Since there will be no further Commission extensions, it is important for all public companies and their auditors to act with deliberate speed to move toward full Section 404 compliance.”

SEC Chairman Mary L. Schapiro

Securities & Exchange Commission

“The Commission is for the first time resolving that uncertainty by making it clear that all public companies, regardless of size, will be required to comply with Section 404(b) of the Sarbanes-Oxley Act.”

Commissioner Luis A. Aguilar

Public Companies Accounting Oversight Board

“In its latest summary of its inspections of the eight largest audit firms — covering four years of reviews — the Public Company Accounting Oversight Board pings the auditors for failing to use enough professional skepticism in their audits of companies' financial statements...

PCAOB®
CFO Magazine

Public Companies Accounting Oversight Board

“A second area reviewed, actually a subset of the first, was the assessment of fraud risk.”

“In a minority of audits, the board found failure to do more rigorous testing in areas of greater risk, and failure to test compensating controls.”

PCAOB®

CFO Magazine

Public Companies Accounting Oversight Board

“The board also evaluated auditors' use of the work of others to cut down on their own work, a practice that AS5 specifically allows. But some audits didn't sufficiently assess the competency or objectivity of others' work, particularly when the work was performed by company personnel other than internal auditors.”

PCAOB®

ALL Governing Boards

Smaller companies have a harder time performing SOX inhouse, because evaluators must be competent AND objective. Objectivity requires a person to be uninvolved in the process altogether. Otherwise they would be reviewing their own work, which is not considered a valid monitoring evaluation. Competence and objectivity are required by COSO, SEC Interpretive Guidance and PCAOB Standard 5.

PCAOB®

ALL Governing Boards

Smaller companies rarely have competent repeat skill sets in house. This is particularly apparent in Information Technology. A complete review of the IT function is required each year. Smaller companies typically have only one or two internal IT staff. Therefore it is difficult if not impossible to effectively objectively assess IT, since the assessor is probably the one doing the work.

House of Representatives

H.R. 4173, Wall Street Reform and Consumer Protection Act would exempt companies with market caps of \$75 million or below from Sarbanes-Oxley Act's Section 404(b). Section 404(b) requires a company's auditors to document and test its internal controls over financial reporting (ICFR).

Senate Finance Committee

The exemption of SOX 404(b) is notably absent from the Senate version of the reform bill drafted by Christopher Dodd, Chairman of the Senate Finance Committee.

Senate Finance Committee

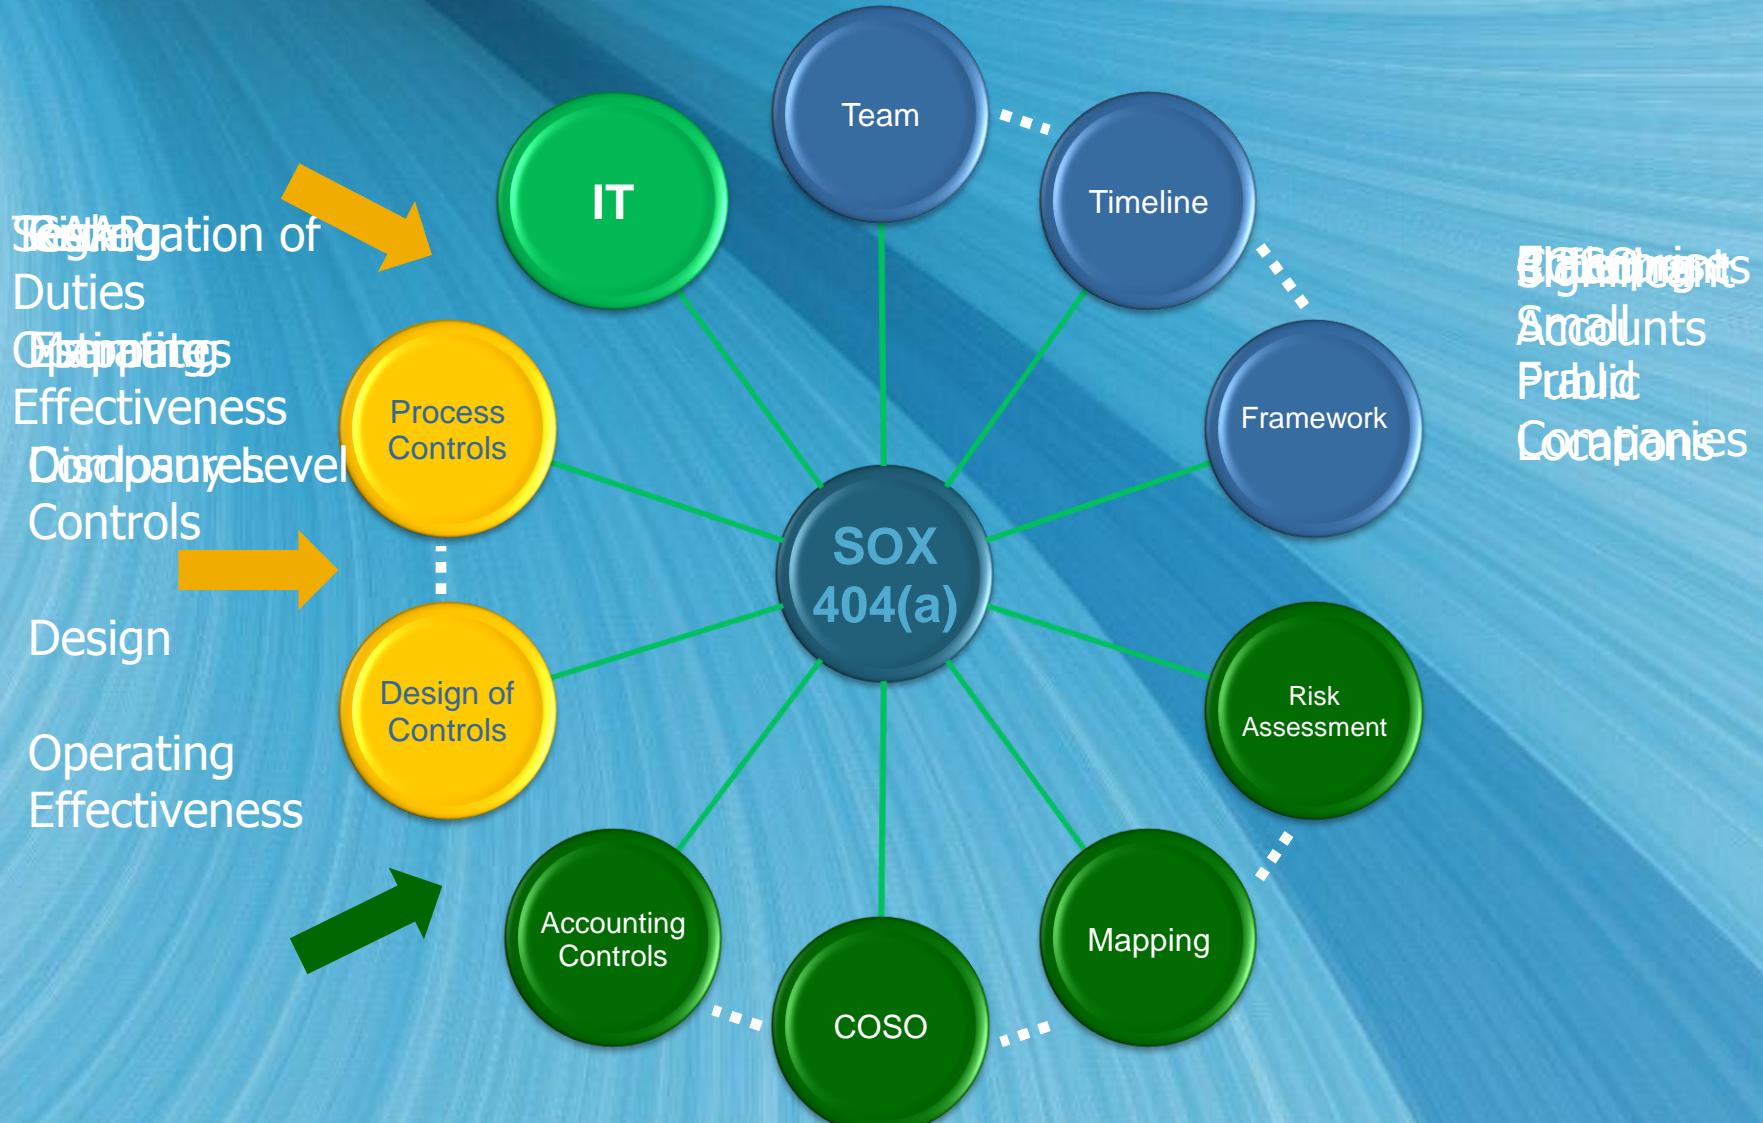

Sen. James DeMint mentioned he will introduce an amendment to the Senate's proposed regulatory reform bill that would exempt non-accelerated filers from compliance with Section 404(b) of the Sarbanes-Oxley Act.

What is Virtual SOX?

What is Sarbanes-Oxley
Section 404(a)?

Lord & Benoit's Framework

Four Resource Requirements

**High Level
Internal Control**

**Low Level
Internal Control**

Financial Reporting
(EITF, SOPs, FASBs,
SABs)

High Level
IT

Advantages of Virtual SOX

- ♦ Least vexing way to comply SOX Section 404(a) - without compromising quality
- ♦ Multiple locations
- ♦ Most cost effective: no travel time or travel costs
- ♦ Evaluators are well trained and supervised

Advantages of Virtual SOX

- ♦ Minimal management disruption
- ♦ Convenience to outside auditors
- ♦ Engagements are well planned
- ♦ Meetings are scheduled, min ad hoc
- ♦ The right questions are asked in advance

What is Virtual SOX?

- ♦ Background
- ♦ Definition of “Virtual SOX”

“The process of using remote technologies to reduce the costs of complying with SOX Section 404(a) without sacrificing the quality of a review of internal controls over financial reporting (ICFR)

Why can Virtual SOX be done remotely?

- ♦ Not an audit
- ♦ Management Self Assessment
- ♦ Local administrative personnel
- ♦ As long as objective
- ♦ Relationship of objectivity to size of business

How can SOX be done remotely?

- ◆ Use of simple and affordable technology tools.
- ◆ Good communication
- ◆ Good project management, planning, scoping, sampling
- ◆ Choices of evidence: inquiry, reperformance, inspection, observation

Virtual SOX 404 - TOOLS

- ◆ Teleconferencing, online audio visual meeting tools
- ◆ Web-based presentation tools using screen sharing (our machine or the client's machine could be viewed or changed real time)
- ◆ Share contact lists including the outside auditors
- ◆ E-mails for copies of financial statements, spreadsheets, journal entries and disclosure checklists

Virtual SOX 404 - TOOLS

- ◆ Document scans
- ◆ VPN connections
- ◆ Screen shots
- ◆ Version control and access control tools to prevent unauthorized or inadvertent file changes.
- ◆ Shared site for sharing any documents, secure, SSL certificates, encrypted uploads and downloads to/from the site

Virtual SOX 404 - TOOLS

- ◆ Agreed upon Timelines
- ◆ Project tracking
- ◆ Scheduling
- ◆ Automatic notification of document updates

Virtual SOX Site

Live

Virtual SOX IT

Virtual SOX IT

Can it work? Yes!

- ♦ CHALLENGE: perform SOX IT assessment remotely due to schedule conflicts, multiple locations, resource restraints
- ♦ SOLUTION: a Virtual SOX IT engagement
- ♦ RATIONALE: efficient, unobtrusive, cost-effective

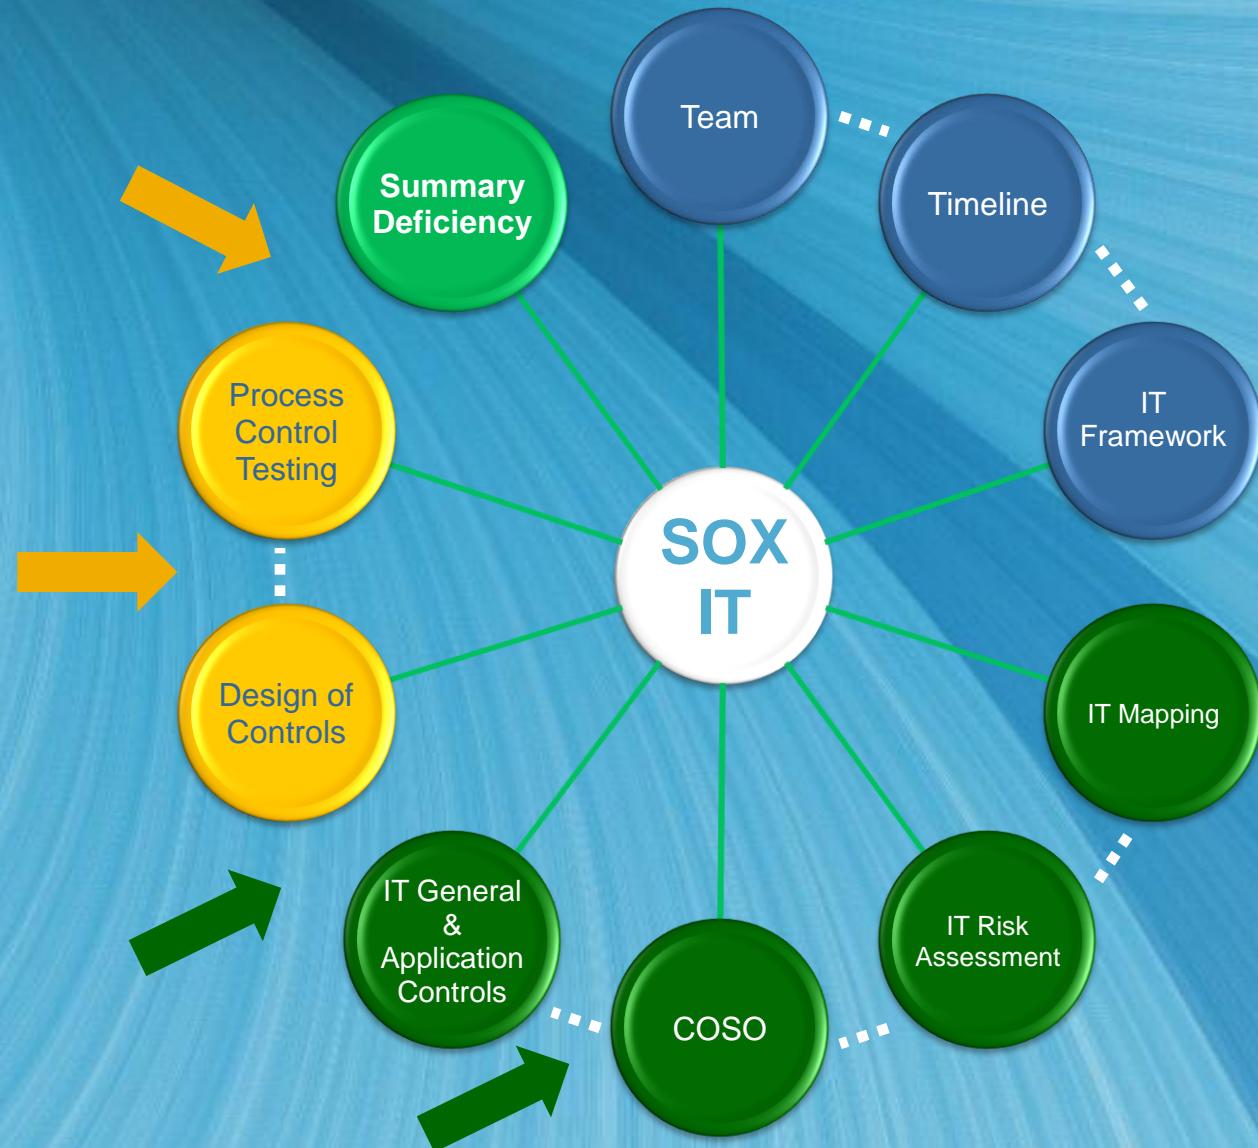

Virtual SOX IT Implementation

- ♦ Risk Assessment/Mapping/Narratives/Design of Controls and testing—can all be easily accomplished remotely
- ♦ Collaboration tools such as Windows Live Meeting or WebEx , audio/video conferencing, web-based content management system

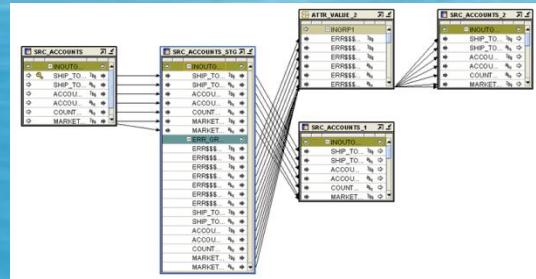

Virtual SOX IT Data Collection Technology Guidelines

- ♦ Deploy technologies that can be implemented and maintained with a minimum of effort
- ♦ Implement simple solutions in order to avoid the costs associated with complexity
- ♦ Standardize on as few software and hardware platforms as possible to benefit from economies of scale

Lord & Benoit's IT Assessment

IT Mapping

Business Process and Sub-Process	Overall Rating	Application Name	Database	Operating System	Critical Spreadsheet Name	Supported by a Third Party	Hosted by a Third Party Provider
Cash Management	H	MS Dynamics	MS SQL	Windows 2008	N/A	Yes	Yes
Investment Securities							
Order Processing							
Credit and Collections							
Revenue Recognition							
Purchasing to Payables							
A/P and Cash Disbursements							
Employee Master File Maintenance							
Process Payroll							

IT Risk Assessment

- ♦ Identify and focus on critical information assets (processes, systems, staff)
- ♦ Consider the relationships among critical assets
- ♦ Evaluate risks in operational context
- ♦ Establish control objectives & key controls to reduce risks to an acceptable level

Establishing the Control Environment

Ref	XYZ Company Level IT Control Principle ©2008 Lord & Benoit LLC	Summary of Controls		Summary Evidence of Control	Design Effectiveness (Fully met, partially met, not met)
		Entity Wide	Process Level		
IT-3	How does the company ensure that Information Systems and Technology software development properly reflects users' needs?	✓		There is no internal development function; using COTS products to support entire environment.	N/A
IT-4	What is the users' perception of Information Systems and Technology? How does Information Systems and Technology management assess this?	✓		Users generally feel that IT is responsive to their needs. Any major problem is usually brought to the attention of management.	Fully Met
IT-5	What measures for Information Systems and Technology quality exist? How do they compare with the general attitude to quality at the company?	✓		System availability is extremely high. Have strong monitoring functions in place that identify problems quickly in order to be addressed.	Fully Met
IT-6	Are there significant Information Systems and Technology activities outside the Information Systems and Technology function? How much of the systems and technology is owned and maintained by the users?	✓		All IT functions are performed by either IT personnel or their authorized vendors. Users do not manage any part of the infrastructure.	Fully Met

Virtual SOX IT

Narratives/Populating Control Matrix

Process	Control Objective	Rationale/Risk	Key Control	Key Reports	Frequency of Control	Manual/Automatic	Preventative/Detective	Control Owner	Evidence of Control	Design Deficiency?
4. Manage Changes	4.1 Controls provide reasonable assurance that system changes of financial reporting significance are authorized and appropriately tested before being moved to production.	Managing changes addresses how an organization modifies system functionality to help the business meet its financial reporting objectives. Deficiencies in this area could significantly impact financial reporting. For instance, changes to the programs that allocate financial data to accounts require appropriate approvals and testing prior to the change to ensure classification and reporting integrity.	4.1 Requests for all changes are subject to the IT Change Control document requirements as incorporated into the HP OpenView Service Desk change management module	IT Change Control Document Closed Changes Report IT Change Request ticket	Weekly	Manual and automatic	Preventative	VP of IT	Change tickets in service desk	
		4.2 Change Management procedures ensure that the stability of the production environment is not compromised through the completion of an impact analysis including security impact.	IT Change Request ticket	Weekly	Manual	Preventative	VP of IT	Documented impact analysis in the Change tickets		

Virtual SOX IT Design of Controls/Operational Testing

- ♦ Documentation and Evidence collection to support Test Matrix
- ♦ Tools/methods include: VPN, remote desktop, video cams, screen capture, conference calls

Virtual SOX IT Security Guidelines

- ♦ While there is no defined standard for securing/storing of SOX data, there are multiple privacy data requirements
 - ♦ Virtual private networking (VPN)
 - ♦ SSL websites with password controls
 - ♦ Encrypted e-mail
 - ♦ Encrypted server storage
 - ♦ Locked/alarmed cabinets

Virtual SOX IT—Final Thoughts

- ♦ Managing/accessing your data is crucial to a successful Virtual SOX IT engagement
- ♦ Structured document repositories such as SharePoint allows easy access to management, internal/external auditor at any time
- ♦ Data easily accessible for analysis
